Automated Export System (AES)

Automated Export System (AES)

What is it?

The Automated Export System (AES) Software allows the electronic filing of export information directly to U.S. Customs and Border Protection (CBP). All exporters must file Electronic Export Information (EEI) to AES electronically.

How it works?

Multiple agencies can transmit export shipment data via Electronic Data Interchange (EDI) directly to CBP. After submitting AES customers will electronically receive Internal Transaction Number (ITN) as a confirmation of successful export data submission.

The GeTS AES service offers users Web-based or XML Integrated Enterprise to submit EEI to CBP quickly and securely that complies with record-keeping requirements by CBP.

In addition to electronic transmission, GeTS AES users can also make changes and correct errors. GeTS AES service also offers pre-validation of the data to ensure accuracy. Real time notification alerts for all CBP responses can be received via email and SMS.

Benefits

24/7 CUSTOMER SUPPORT

On demand access to support for all devices

OFFLINE NOTIFICATIONS

Receive email and SMS alerts on key filing events

DATA RETENTION

Comply with Customs Act records keeping regulations

REPORT GENERATION

Data reporting exported to spreadsheet for internal audit, records keeping and management purposes

AUTO-FILL TEMPLATES

Numerous in-app functionality for valuable time savings

Subscription Options

WEB

The GeTS AES Web-based filing is designed with the end user in mind. Users can enter compliant EEI details quickly and easily without missing any mandatory fields with our highlighted entry fields, receive an ITN within seconds and produce the supporting documentation easily. The real-time 'Dashboard Status Report' and ITN 'Notification' (SMS/email) can be tailored to meet an exporter's unique requirements anytime.

INTEGRATION

If operating with an in-house or 3rd party software, we offer data integration that can seamlessly transfer AES submissions and responses directly to customs. Users who wish to reduce time spent online and minimize errors can rely on GeTS AES XML integrated Enterprise. GeTS will work with your IT so that filers don't have to rekey the same data across different applications. This is made possible with industry standard real-time messaging.

Who should use it?

Exporters

Authorized Agents

GeTS

Global eTrade Services (GeTS) is a CrimsonLogic subsidiary and a key growth engine for the Group. GeTS has a comprehensive suite of global trade connectivity services that helps traders meet regulatory and compliance requirements from Government agencies and trade associations around the world. Based on a SaaS model, GeTS is centred on a global trade platform that facilitates cross-border trade with Compliance Connectivity, eAdvisory and Data Analytics suite of services.
