RNS  
WACM

## What is RNS WACM?

The Release Notification System (RNS) is an automated application that notifies carriers of Canadian Customs trade declaration release and Pre-Arrival-Release-System (PARS) Accepted message. The RNS messages can be used to update systems, to schedule deliveries or initiate the preparation of accounting data. Additionally, carriers can electronically notify other parties affected by the release and ensure more timely delivery of shipments.

The PARS messages include current release status for shipments crossing the border, and also includes information such as the broker entry number, cargo control number, customs office port, date and time of release, and other applicable information. Each message is date and time stamped by CBSA.

CBSA highly recommends RNS for the filing of electronic advance cargo and conveyance information, and that carriers become RNS participants. This will allow carriers to receive broker entry numbers in ACI.

## How does it work?

### At FPOA:

**Cargo Status:** Carrier arrives: submits CACM  
**Applicable Notices:** Reported

### Primary Warehouse:

**Cargo Status:** Shipment arrives at primary  
**Applicable Notices:** Arrived, Deconsolidation

### Sufferance Warehouse:

**Cargo Status:** Shipment arrives at WC, trasmits WACM  
**Applicable Notices:** Reported, Arrived  
**RNS Messages:** Released or referred for examination

## What Types of Messages are Available?

### “Declaration Accepted, Awaiting Arrival, of Goods”

Instant notification of broker entry numbers against your PARS shipments. Cleared cargo no longer has to be verified by calling the customs broker to obtain entry numbers. This message also indicates the goods are ready to be arrived at the border.

### “Goods Released”

Automated “Goods Released” messages are generated and sent electronically according to the carrier code, customs office number or warehouse location.

### “Status Query”

Verify if CBSA has processed the release documents for shipments using the RNS Status Query look up feature.

### “Arrival Certification” (In bond arrival)

Warehouse operators can transmit arrival messages to notify CBSA of the arrival of commercial shipments and CBSA returns a message to advise whether the goods have been released or referred for examination.

## Benefits

<b>Date and Time Stamp</b> <p>Each message is date and time stamped by CBSA, which can aid in the event of a CBSA compliance audit Avoid delivery costs, communication costs or extra toll fees by preventing the likelihood of the truck being turned around at the border</p>	<b>24/7 Customer Support</b> <p>24 hours support 7 days a week via email, online, or chat.</p>
<b>Visibility</b> <p>Verify if cargo has been “customs cleared” when the driver crosses the border or when the customs broker clears inland cargo from a bonded warehouse</p>	<b>Notifications</b> <p>Receive and monitor release messages directly from CBSA on a 24/7 basis Electronically notify other parties who are affected with the use of email and SMS alerts</p>
<b>Advanced Integration Options</b> <p>Save time and money by filing directly to CBSA</p>	<b>Report Generation Capabilities</b> <p>Quick eManifest preparation and responses with email and cell phone SMS notifications</p>

## Subscription options

### WEB

Many enhanced features on the web account are available to ease your data entry, such as CSV upload feature and a customized data master. Email or SMS alerts for responses received from CBP are communicated directly to the filer and other team members in the organization

### RNS WACM FILING SERVICE

The BPO solution is a program for filers who may need after-hours or holiday support. Simply fax or email your paperwork to our 24/7 ACE processing facility and we will prepare and submit the Airway Bill data to CBP.

### INTEGRATION

If operating with an in-house or 3rd party software, we offer data integration that can seamlessly transfer Airway Bill submissions and responses directly to CBP. GeTS will work with your IT so that filers don't have to re-key the same data across different applications.

## GeTS

**Global eTrade Services (GeTS)** is a CrimsonLogic subsidiary and a key growth engine for the Group. GeTS has a comprehensive suite of global trade connectivity services that helps traders meet regulatory and compliance requirements from Government agencies and trade associations around the world. Based on a SaaS model, GeTS is centred on a global trade platform that facilitates cross-border trade with Compliance Connectivity, eAdvisory and Data Analytics suite of services.
